Spruce Grove News

Miss Aileen Piercy is spending a vacation with an old Spruce Grove friend, Miss Ruth Pearson at Hughenden.

Mr and Mrs Leo L Piercy returned to the Grove on Monday, from Edmonton, where they had spent part of their summer vacation.

Miss D Bates, accompanied by Miss Clara Burch of Mannville, returned from Chicago on Sat. last, where they had spent part of their extensive vacation at the World's Fair.

Miss Burch is at present visiting with Mrs Bates.

Dave Bell has installed another 10-gallon gas pump, rendering to his many patrons a variety of Union white and Union 76 gas.

Mr J Schenkein Sr. has removed his residence from the farm and re-located it on the corner of 1st and North ave.

Miss V Zimmer and Principal Piercy have been re-engaged to teach for the 1933-4 term at the local school.

Services will be resumed on Sunday morning next at the United church.

How He Found Out.

"I never knew until I got a car," said the bishop, "that profanity was prevalent."

"Do you hear much of it on the road?" "Why," replied the bishop, "nearly everybody I bump into swears dreadfully."

On Stony's Good Road.

While motoring down, on Sunday evening, on that fine piece of road from Mike's Curve, at the Highway, to Tony's corner, Mr R E Foote, of Edmonton, had the misfortune to break a right rear axle on his sedan. When Mr Foote got off to investigate, there was no right rear wheel in sight. A search party was rewarded by finding it some distance from the road, in the brush. The road-service brigade from the S. & M. Service Garage very promptly installed a new axle, and in a comparatively short time the Foote motor party was on its way home to Edmonton.

Accident on the Highway.

While a sedan driven by Mrs P J McEvoy of Edmonton was passing the residence of Mr R Goerz, on Sunday evening, on a return trip to Edmonton, something went wrong with the steering gear, and the machine was ditched, throwing all hands out—the driver, her four children, and a Miss Irma Barker. The latter was the more severely injured of the sextet, and was brought to Stony Plain, where her injuries were attended to by Dr Walton. Afterward Miss Barker was taken to a City hospital by Mr John Michaels. The other occupants of the sedan received slight injuries from broken glass, and bruises, but were able to proceed home. Miss Barker was a niece to Mrs McEvoy. The sedan made a complete somersault, landing on four wheels.

Obstructing a Surveyed Road

On Tuesday last a charge against John Nichol of Edmonton Beach was heard before Magistrate McCulla. The charge was laid by John Staab councillor for division six of Inga Municipality, namely, that John Nichol did obstruct a surveyed road allowance by moving a building thereon.

After hearing evidence at Stony Plain, the magistrate adjourned the case to Edmonton Beach, so that he might view the premises. After looking over the premises the magistrate found the accused guilty, imposed a fine and ordered the building to be removed.

Geo. J. Bryan appeared for the prosecution.

Departmental Exams.

Under the present system, and with the teachers away on their holidays, it has been rather difficult to get definite accurate information regarding the results of the Departmental exams. Stony Plain pupils, on the whole, however, appear to have done well in their high school examinations. The Edmonton Journal has recently printed a series of departmental results; but these applied only to those scholars attending Edmonton schools.

Lessons Of The World Grain Show.

The great World Grain Exhibition and Conference has become a matter of history, but to the thousands of visitors who were privileged to view its wonderful display it will long be remembered as one of their most delightful and instructive experiences. Western Canadians, in particular, who had never had the opportunity of visiting the other provinces of their own Dominion must have been deeply impressed with the variety, magnitude and richness of the resources of their country, and to have obtained through the various provincial exhibits a renewed confidence in the future of Canada.

A tour of the British Columbia exhibit could not fail to have impressed one with the amazing wealth of resources in that great province. Divided into three sections, the exhibit depicted first the forest and mineral wealth of the Pacific Coast province; then the magnificent fruit products, with their attractive orchard scenes, and finally the fisheries whose products are known and in demand the world over.

Or, jumping over the prairie provinces and into Ontario, the visitor found, not an amazing display of manufactured products from that great industrial province, but they were impressed with the wealth which is being produced from all the riches of the province as indicated by the thousands of dollars' worth of minerals on display. They learned how Ontario was proceeding with a vigorous reforestation policy to maintain its forest wealth, how forest fires are fought, and other steps taken to conserve this great natural resource.

Studying the Quebec exhibit, depicting the quiet pastoral life of the people away from the industrial centres, one could not fail to get a new understanding of the ancient province, and to realize what a steady influence it is bound to exert upon the national life of the Dominion. The teeming commerce on the mighty St. Lawrence, its great maritime ports, with the neat, intensively cultivated farms stretching back from the river banks, all conveyed a picture of beauty, strength and progress, the homes of contented thrifty people.

To visitors from other provinces and countries, the exhibits of the prairie provinces must have been a revelation indeed. Holding the view, as undoubtedly many such visitors did, that these provinces produce nothing but grain and other agricultural products, they certainly had their ideas expanded. Manitoba devoted its exhibit to a display of the wild bird and animal life of that province, extending from its southern prairie fields to the arctic circle. It was one of the show exhibits of the Exhibition and people stood before it in interested crowds lost in admiration.

Alberta demonstrated that it could grow wheat by carrying off the world's wheat championship, but it also let visitors know that 14 per cent. of all the coal supplies in the world were located within its borders, that it produces tens of millions of pounds of best sugar annually, that its lakes and rivers teem with fish, that its timber areas are very large.

And Saskatchewan, popularly known as the "bread basket of the Empire," which in normal years produces more than one-half of all the wheat grown in Canada, and more than any other single province or state in the world, surprised everybody with its wonderful exhibit of huge logs from its timbered regions, its many varieties of fish, and big fish at that which would do credit to a province by the sea, its mineral wealth of coal and days in the south and richer metals in the north, its wild bird and animal life, its scenic beauty spots.

The usually accepted picture of the prairies as flat, uninteresting fields of grain, and nothing else, was dispelled by these truly wonderful exhibits. Even to the people living on these prairies they were a revelation. And to unite the whole were the comprehensive exhibits of the Dominion Government revealing in all their richness and variety the magnitude of the resources and products of Canada.

But why recall these things now the Exhibition is over? Because one of the objects of the Exhibition was to bring this knowledge in its most interesting and fascinating and compelling form to the people of Canada and the world. Seeing as believing, and those who saw Canada on parade at Regina cannot fail to have been impressed and convinced of the development and prosperity which the future has in store for this Dominion, and for every part of it.

And such conviction was reinforced by the peeps into the past which were also afforded. One had only to stick their head through the window of the old Hudson Bay trading post and examine its contents, or gaze upon the means of transportation in the days of the pioneers,—not so very long ago at that,—the old Red River cart, the dog sled, the Esquimo boat, and contrast them with the great Hudson Bay stores at Winnipeg and Calgary, to mention only two, and with the C.P.R. and C.N.R. exhibits and the automobile exhibits of modern means of transportation, to appreciate the fact that Canada has made amazing progress in the short span of its national existence. Such progress offers but a glimpse and a promise of the still greater progress and development that is to be.

Thus in the midst of a depression which has to some extent at least shaken the confidence of many of our people, the World Grain Exhibition came with its wonderful and beautiful story. It also brought a message. It is not a message of despair, but of hope. A message that, trying and difficult as times may temporarily be, they are, after all, only temporary because a nation with such resources, with such culture, with such virile and progressive people, cannot fail to surmount any and all difficulties. Canada is for the moment caught in the maelstrom of world events and conditions beyond our control, but it will win through and rise to greater, grander heights than ever before.

Bowel Complaints of Children During the Summer Months

Mothers should look well after their children during the hot summer months. Despite all they can do the children may be seized, at any time, with diarrhoea, dysentery, summer complaint, or other forms of bowel trouble.

There is a safe remedy in Dr. Fowler's Extract of Wild Strawberry; a remedy that has received the endorsement of legions of Canadian mothers during the 58 years it has been on the market. Don't experiment. Use Dr. Fowler's and be on the safe side.

Esquimo Slaying

Village Bad Man Killed By Other Members Of The Tribe

Story of the slaying of an Eskimo village "bad man" by other members of the tribe, is told in a wireless report, received at Royal Canadian Mounted police headquarters at Ottawa from Inspector T. Sandys' Wunuch, on board the Northern supply steamer "Nascopee."

On-Shoak-Juke, an Eskimo who 13 years ago killed a fellow-aborigine at Cape Dorset, in Baffin Land, met retribution six months ago, when his own life was taken by a trio of Eskimos whom On-Shoak-Juke had been threatening.

The dead native was regarded as insane. He had shot at his wife some time before his own death, and for no apparent reason he had informed the three men who eventually killed him that he intended shooting them.

The trio forestalled him, and took the law into their own hands. They decided that the tribe would be better off without On-Shoak-Juke, and forthwith shot him.

When Inspector Sandys-Wunuch reached the village on board the "Nascopee," the tribal chieftain and all interested parties were produced and an inquiry set on foot. The inspector informed headquarters that a complete report would be mailed when the "Nascopee" reached Mooseone on her homeward trip.

WIFE'S DELIGHT AT HUSBAND'S LOSS

30 Pounds of Fat!

Here is something all wives of fat men will be glad to know. It is the experience of a woman whose husband recently weighed 230 lbs. She writes:

"I really feel I must write and tell you that, after taking Kruschen Salts for nearly 3 months, my husband has got his weight down from 230 lbs. to 200 lbs. This has been achieved by nothing else but Kruschen. I am too heavy also, and I started taking Kruschen only three weeks ago. Already I have got down from 153 lbs. to 144 lbs. We are delighted."

(Mrs. C.) Kruschen combats the cause of fat by assisting the internal organs to perform their functions properly — to throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

Nothing To Worry Them

Newfoundland Is Lucky To Have Backing Of Mother Country

It may be a bit of a shock to Newfoundlanders to realize that the time they are to have their Dominion status virtually taken away from them and the country placed under a commission which will perform all the essential functions of government. That, at any rate, is the recommendation of Lord Amulree's commission which came out to Newfoundland to investigate, and it is likely to be adopted.

But Newfoundland should not worry. Newfoundlanders should be very happy to think that somebody else is going to take over the job of straightening out the tangle into which they have gotten themselves. What has happened is simply this: One of John Bull's family has got into a financial straits, and the old man is coming to the rescue. He says in effect: "Here, just stand aside for a while until I put you on your own feet and when I see that you are all right I'll stop and you can run your own house again." That is one of the advantages of being able to lean on a Mother Country. — St. Thomas Times-Journal.

How the Rule Works

National Problem Doubly Ease When Man Obtains Job

As a national problem a man thrown out of work is only half the mischief done. It means one less worker to carry the burden of one more dependent. Fortunately, the rule works the other way when it comes to increased employment. A man in a new job means for the whole nation one more worker to carry one less dependent.

Supposing that at the depth of the depression in March we had 12,000,000 persons idle, it would mean that we had 36,000,000 persons at work. We had three people with jobs to carry one without a job. If today employment has increased by 3,500,000 jobs, it means nearly 40,000,000 persons at work, against 8,500,000 persons still idle. We have almost five workers to carry one idle person. The social burden is almost cut in two. — New York Times.

Britain May Capture

Coveted American Cup

New All-Steel Cutter Revives Hope Of Sportsmen

A beautiful new streamlined racing cutter, winning race after race by spectacular margins, suddenly has revived British hopes of capturing the American cup.

The cup—"that old mug" so persistently pursued by Sir Thomas Lipton for 33 years—probably is more coveted by British sportsmen than any other trophy in the world. Why Britain never had been able to regain it since it crossed the Atlantic in 1851 is a riddle.

But Britainers believe that the answer has been found in "Velosha," ultra-modern all-steel creation of Charles E. Nicholson, who designed the last two Shamrocks for Sir Thomas Lipton. "Velosha" embodies all the lessons Nicholson learned from the defeat of "Shamrock V." by Harold Vanderbilt's "Enterprise" in 1930.

The success of the new cutter has made it almost certain that her owner, W. L. Stephenson, will succeed the picturesque and beloved Sir Thomas as challenger for the cup. Stephenson, chairman of the British subsidiary of F. W. Woolworth & Co., named the yacht after his three daughters, Velma, Sheila and Daphne.

No contest could be held this year, since the challenge must be made at least nine months before the race, but British yachtsmen believe Stephenson will issue it in the fall if "Velosha" keeps on winning. In the great Scottish racing festival known as the "City of Edinburgh," which just ended, "Velosha" won five firsts and three seconds out of nine races over "Shamrock V." and King George's Britannia. The two wins "Shamrock" scored over "Velosha" were by margins of only a few seconds, while all "Velosha's" victories were decisive.

"Velosha's" chief feature, aside from her steel hull, is the now-famous "Park Avenue" boom, frankly copied from the "Enterprise" with a few more ideas added. It greatly speeds up handling of the material. Moreover, she is equipped with all the other time-saving mechanical devices which Lipton said were responsible for "Enterprise's" victory, in the last cup race.

Almost a sure sign "Velosha" was built to challenge for the cup is the fact that it is 88 feet on the waterline and 127 feet overall. That is longer than "Shamrock V." which felt the need of more length in the rougher American waters where the cup course is laid. "Shamrock," moreover, was noticeably inferior to "Enterprise" in sailing to windward. "Velosha" is an improvement in this respect.

Otherwise the new cutter adheres pretty much to the international specifications for "J" class yachts. It is of slightly more than 200 tons, has a sail area of 7,500 feet, a 158-foot mast, a beam of 21 feet and draft of 15 feet lead keel weighs about 80 tons.

"The Other Club"

Distinguished Organization In London Celebrates Twenty-First Birthday

One of the most distinguished dining clubs in the world, known as "The Other Club," has just celebrated its 21st birthday by a dinner at the Savoy Hotel, London, England, among the guests being Sir William Jowett, former Attorney-General, and Lord Kylsant, former President of the Federation of Chambers of Commerce of the British Empire. General Jan Christian Smuts, South African statesman, presided at the coming-of-age party.

The club founded by Winston Churchill, and the late Lord Birkbeck meets once a fortnight for dinner in a private room at the Savoy during the time that Parliament is sitting. It was intended to provide a ground whereon political opponents might meet. One of the rules is that "nothing in the intercourse of the members shall be allowed to interfere with the full asperities of party politics."

Doctor's Hand Valuable

Loss of the use of his right hand in an automobile accident has brought to Dr. Abraham Goldfoot, of Cheltenham, England, a verdict of \$30,000 damages. His wrist was broken when he was struck by an automobile while on his way to write prescriptions, he has to take an assistant with him wherever he goes.

Broomhall Declares Canadian Wheat Will Always Be At A Premium In Markets Of World

Canada's wheat still stood supreme as the world's grain show and conference came to a close at Regina.

Pocketing the biggest winnings of the \$100,000 in cash prizes, the Dominion's farmers saw their banner at the top of the mast, with hopes rising that demand for Canadian wheat from foreign countries would cut down the 1933 carryover. Experts who attended that conference gave farmers encouragement in disclosing European countries wanted the Canadian grain.

The big share of the prize money from all grains went to the Dominion. Its growers took \$64,873, more than double the \$25,536 which went to United States growers, and \$8,221 won by farmers in countries other than Canada and the United States. Approximately \$2,000 of the prize money was not awarded because judges felt some entries were not worthy.

A carryover of Canadian wheat of approximately 200,000,000 bushels, as the cereal year ended July 31, compared with 12,962,961 bushels at the same date at the close of the previous cereal year, was a problem for farmers to ponder in view of their top-rated wheat.

But the Canadian growers were given assurance it was not the lack of quality in their product that kept it from being purchased in still larger quantities on international wheat markets. In a paper to the conference, Britain's noted marketing expert, Broomhall, declared it was protection by foreign countries which caused the difficulties.

All millers, Broomhall disclosed, did not and could not buy Canadian wheat because of high duties and milling restrictions of importing countries. Millers wanted Canadian wheat, and the conference was told, Canadian wheat will always be at a premium in the markets of the world. The message was echoed by other experts.

Led by the newly crowned wheat king, Ireland Wilford, of Slattery, and the noted northern grower, Herman Trelle, of Wembley, Alberta, captured the greatest share of the prize money going to Canadians. Alberta's earnings were \$25,152, almost equal to the total amount won by United States farmers.

Saskatchewan was second in the list, earning \$12,333 with British Columbia, third, earning \$11,427; Ontario, \$7,993; Manitoba, \$5,603; while the balance was spread between Quebec, New Brunswick, Prince Edward Island and Nova Scotia. Earnings of countries other than Canada and the United States were: Australia, \$6,766; Siam, \$741; British Guinea, \$200; New Zealand, \$150; Ireland, \$150; England, \$91; Scotland, \$48; Southern Rhodesia, \$40; India, \$34.

The curtain rang down on the greatest grain show ever held in the Dominion, while proposals were being pressed to establish a permanent branch of the Federal Department of Agriculture to assure similar events at future times. Another world's show for the Dominion, probably some where in the eastern provinces, is being suggested for 1938.

Keep Eyes On Road

Dangerous For Motorist To Relax Vigilance Even For Second

It is dangerous to take the eyes off the road for even a second in this day of high speed driving. If the motorist is driving at thirty miles an hour, his car is going at the rate of forty-four feet each second. If another car is coming toward him at the same speed the cars are approaching at the rate of eighty-eight feet per second.

When travelling at sixty miles an hour and approaching another car going at the same speed in the opposite direction, the two cars are coming together at the rate of 120 feet in one second. It is easy to see that in circumstances such as these it is not safe to have to look for more than a fraction of a second at the speedometer, oil gauge or any other dash device.

W. N. U. 2007

Cheaper Than Detective

Berlin Police Furnish Personal Information For Twelve Cents

It costs only 12 cents to find out all about the lady in Berlin.

Whereas lovers swains (or more often ambitious dowry-chasers) in France have to hire private detectives or bribe janitors in order to ascertain whether she is single, married, divorced, 21, or 43, rich or poor—the obliging Berlin police, under new regulations, furnish all the information for 50 pennings.

Being German police, and therefore thoroughness personified, they keep tabs on everybody. And being police, and therefore proverbially unsentimental, they will not only divulge the above-mentioned data, but come through with her religion, birthplace, and maiden name.

The lady, if she wants to get even can do the same. She may obtain, for the same fee, the gentleman's full name, profession, parents' names, and previous residence. If he has real property, she is entitled to know that too.

To prove that sophisticated Berliners are just as inquisitive as small-town folk, written or personal requests for information of this sort in the past, under more stringent regulations, averaged 500,000 a year.

Fisheries Production

Had a Market Value Of Nearly \$26,000,000 Last Year

Canada's fisheries production in the calendar year 1932, as shown by statistics prepared for publication by the Dominion Department of Fisheries and the Dominion Bureau of Statistics jointly, had a marketed value of nearly \$26,000,000—to be exact, \$25,997,135. Of this total, \$21,763,111 came from sea fisheries production and \$4,194,022 from the inland or freshwater fisheries.

The year's aggregate was \$4,560,175 less than the 1931 total, and the falling off is explained, of course, by the disturbed world economic conditions which prevailed. Fish were as plentiful as ever in Canada's vast extent of fishing waters but marketing was difficult and prices low. The Dominion's fisheries figures will climb again as normal world conditions return.

Fisheries production value showed a decrease in each of the provinces and in the Yukon Territory in 1932, although in Alberta there was a drop of only a couple of hundred dollars and the Manitoba decrease was relatively small. By provinces, the marketed value was as follows:

British Columbia\$2,909,116
Nova Scotia6,557,943
New Brunswick2,972,708
Ontario2,147,990
Quebec1,815,544
Manitoba1,204,832
Prince Edward Island988,919
Saskatchewan189,174
Alberta153,789
Yukon Territory20,960

SPORTS TAILORED JUMPER DRESS IN DUAL MODE

It is navy blue crinkly crepe silk with a fresh white tubular crepe silk gump.

The leather belt is coral-red. The blue bone buttons have coral-red rims. Then there is still another touch of red at the neckline in the pet crepe silk tie.

It's so girlish and smart. It could also be worn with a white organdie gump.

A coral-red crepe silk printed gump with long sleeves offers still another disguise.

Style No. 709 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 16 requires 2 1/2 yards 35-inch for dress, with 2 yards 35-inch for blouse.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Elaborates General Plan For British Community Settlements Under Migration Scheme

Wooden Relic Found

Embedded In Rock Age Is Set At Million Years

Harold Putnam staidipary magistrate for Truro, Nova Scotia, has a relic which he believes may recall the days of a million years or more ago. Going to the Salmon River for a flat stone, Robert Fielding found one suitable for a step to Mr. Putnam's garage. On close examination it was found that embedded in the rock was a petrified stick of wood that the wood has been treated by human hands the exhibit gives every indication.

Judging by the rock, which is said to have been brought from Wallace for a railway bridge at Truro, the age is set at a million years or more and for the wood to become embedded in it showed that the stick is at least a million years old. Around Great Village are many fossils showing the movements of animals of the ages gone by, but the exhibit which Mr. Putnam guards very closely is believed will show the methods and modes of prehistoric human.

Grooves at equal spaces apart that might have been made by man, or machine are discernible and a sort of corrugation lengthwise, the stick gave further evidence that the wood was used for some implement or weapon. A stone cutter will be engaged to cut away a portion of the rock so that more of the petrified stick might be seen.

The stick is at least three inches in diameter and more than ten inches long. The ends are not exposed and it might prove that it was a weapon or a tool of some kind used in the prehistoric ages.

Brighter Prospects

Improvement In Business Conditions Sighted In Bank Letter

Momentum attained by business during the second quarter of 1933 has carried several industries to higher levels though July, states the August commercial letter of the Canadian Bank of Commerce.

"It may therefore be expected that complete reports for the past month will show the volume of business as a whole to have been maintained at about the June level.

In view of the serious crop damage, the breakdown of the World Economic Conference and recent stock market losses, this stability should be regarded as the best showing possible," the letter continues.

The 1933-34 "wheat year" opens now with a short new carry-over certainty, the letter continues, but the abnormally large carry-over of old wheat, some 200,000,000 bushels will make up for the shortage of the new crop and "Canada will therefore have for the coming 'wheat year' a normal supply and an exportable surplus practically equal to the exports recorded for the 1932-33 year."

BRITISH DRIVER HOPES TO SET NEW RECORD

Our picture shows Mr. J. Cobb standing in front of his new Napier Rallion car, in which he hopes to maintain an average speed of 130 miles an hour for twenty-four hours at the Brooklands Track, London. During tests on the track Mr. John Cobb lapped the course at more than 130 miles an hour.

Declaring opinion in favor of resumption of immigration on a normal scale seems to be gaining ground throughout Canada, and asserting his plan has the broad support of the Dominion and provincial governments, Brig-General M. L. Hornby has circulated a new explanation of his plan for "British community settlements" in Canada.

The Hornby plan would send to the Dominion small communities of selected British families, established on areas of proven good-sized-farming land of 5,000 to 10,000 acres in extent, to be sponsored by the existing voluntary migration committees of the counties and towns in the United Kingdom.

Declaring Canada, by the establishment of so great transportation, educational and other services, has already made its share of any 50-50 financing, Brig-General Hornby proposes the United Kingdom make the necessary loans available to the county, city or town committees here at a low rate of interest.

Brig-General Hornby declares the objective of the plan is to establish what may be called "Foundation Community Farm Settlements," small communities of selected British families, established on areas of proven good-sized-farming land of 5,000 to 10,000 acres in extent. In sponsoring the new settlements by the existing county and town voluntary migration committees the object in view is to bring into play the very strong county and town spirit which exists throughout the United Kingdom.

Each committee would acquire by purchase a block of from 5,000 to 10,000 acres of well-situated farm land suitable for mixed farming. The land would be held by the committee in perpetuity, it would not be sold to the individual settlers but would be worked by them on a rental basis, the rental being a proportion of the annual produce. Each committee would select a settlement manager or supervisor from this district from which the settlers come and through this manager would subdivide and develop the area into suitable farm holdings of varying sizes. The manager would have the assistance of a field foreman and other staff with local Canadian experience.

In order to safeguard the committee's interest in the matter of land purchase it is proposed the Canadian Government be asked to nominate an advisory committee in each province, whose function would be to advise in the initial purchase. The committee would guarantee that none of the settlers would be allowed to become public charges at least during the five-year period during which the settler is acquiring legal Canadian domicile.

It is not the purpose of the scheme that settlers remain permanently tenants on the committee's lands. After proving their ability to farm as tenants they would acquire farms of their own. The aim is to have the settler save as much as possible out of his returns during the first three to five years, or longer where necessary.

Literacy In Canada

Slightly More Women Than Men In Canada Can Read and Write

Women have a higher degree of literacy in Canada than men, it was shown in the 1931 Dominion census. The survey showed that 85.7 per cent. of Canada's male population above the age of 10 could read and write and 86.3 per cent. of females.

Ontario had the highest percentage of literacy of any of the provinces, 91.5 per cent., followed by Prince Edward Island with 90.6 per cent. New Brunswick had the lowest percentage, 82.38. The percentages for the other provinces were: N.S., 85.1; Quebec, 84.5; Manitoba, 85.1; Saskatchewan, 85.3; Alberta, 86.1; and British Columbia 85.7.

Opposed To Replacement

His car had taken fire and destroyed. It being insured he went at once to the insurance office and demanded his money. He was given claim form to fill up, and was told would get his money, but that it would be replaced.

"Oh!" said he, "if that's the way so business give me back the money I paid the other day on wife's policy!"

BANK INQUIRY SESSIONS TO BE HELD IN WEST

Ottawa, Ont.—The royal commission on banking and currency concluded the public session in Ottawa for time being, and proceeded to Victoria to open the transcontinental series of public and private hearings.

Dr. W. C. Clark, deputy minister of finance, and C. S. Tompkins, inspector-general of banks for the federal government, were the witnesses and the information covered an interpretation of the functions of the government in relation to the banks as laid down in various Dominion Statutes.

Calgary will be visited on the 18, and Edmonton on the 21. The commission will then proceed to Saskatoon, Regina, and Winnipeg. Precise dates for the hearing in the latter places will be announced later.

Lord Macmillan, chairman of the commission, Sir Thomas White and Beaudry Leman questioned the deputy minister on particular functions and practices in which they were interested.

Dr. Clark outlined functions of the treasury board, a small section of cabinet council presided over by the minister of finance.

Lord Macmillan brought up the question of possible friction between provinces and the federal government in respect to banking and currency.

"Would it be possible to evolve an economic policy that would be applicable to all Canada and not subject to conflicting provincial policies?" the chairman asked.

Dr. Clark asked that he be excused from giving evidence on that point.

Lord Macmillan recognized the question was premature, but decided to keep it to the forefront in the minds of the commission members.

Dr. Clark described the actual legal tender of Canada in complete detail, and also described the operations of the mint and replacement of currency.

"Has the royal mint operated at a profit?" asked Beaudry Leman. "Figures will have to be prepared," replied Dr. Clark. "The assay office at Vancouver has operated at a slight loss but I think the royal mint as a whole has made a profit."

Send Out Strike Ballots

Railway Running Trades Prepare For Momentous Struggle

Montreal, Que.—Members of the railroad running trades have set September 15 for one of the most momentous decisions in the history of Canadian railroads. On that day 24,000 members of the union will be instructed by their general chairman as to the advisability of striking—last legal step in fighting a second 10 per cent. reduction in wages enforced by both the Canadian National and Canadian Pacific Railways.

Ballots were mailed to engineers, conductors, trainmen, telegraphers and engine-men, marking the furthest step taken by any of the railroad unions in their fight against the reduction.

There is no change, it was stated, in the shop trades opposition to both the 10 per cent. reduction effected by the railroads at approximately a year's interval.

Survey Over For Season

Churchill, Man.—Now that the season of ice surveys is at an end, the federal government steamer "Ocean Eagle," under the command of Capt. William A. Poole, will soon be sailing through Hudson Strait on a voyage of some 3,000 miles with destination at some port in the St. Lawrence River or the maritimes. The "Ocean Eagle" will tow the dredge "Churchill No. 1" to the eastern seaboard.

Payment On War Debt

San Francisco.—Five million dollars in ingot silver—part payment of Great Britain's war debt installment—has been taken to the United States mint here awaiting coinage. The metal arrived recently from Bombay. It had been transhipped at Hong Kong and again at Seattle.

W. N. U. 2007

London Wheat Conference

Representatives Of Wheat Exporting Countries To Meet At Canada House

Ottawa, Ont.—Canada House in London, England, will be scene of the reconvened meeting of the representatives of the wheat exporting and importing countries on August 21. It was learned at the office of Rt. Hon. Sir George Perley, acting deputy minister. Sir George has arranged, at the request of Prime Minister R. B. Bennett, to have Hon. M. A. MacPherson, provincial treasurer of Saskatchewan, attend the next session, and Mr. MacPherson is now en route.

Mr. Bennett and Hon. G. H. Ferguson, Canadian High Commissioner in London, will attend the meeting, which is called to explore further the problems respecting wheat production and marketing.

It is understood Mr. Bennett will leave for Canada shortly after the conclusion of the meeting, and that he will be accompanied by Mr. Ferguson, who is expected to make a short visit to Ontario.

U.S. Grain Code

Proposal For Fair Competition For The Grain Exchanges

Washington.—A proposed code of fair competition for the grain exchanges, submitted to the farm adjustment administration, fixed definite minimum margins to be put up in virtually all speculative purchases of grain.

Other portions of the proposed code followed generally rules and regulations established since the recent drop in grain prices caused farm officials to ask the exchange officials to change the regulations.

Heretofore, however, the question of margin requirements on purchases has not been definitely fixed, the requirements being that the margin be "adequate."

The proposed code calls for regulation by the grain exchanges and the carrying into effect by their officials of the rules laid down.

Italian Aviator Victim Of Seaplane Accident

Motor Trouble Caused Machine To Overtake During Takeoff

Horta, Azores.—Four Italian aviators, members of General Iliano Balbo's seaplane squadron, were hurt when their plane overturned during the takeoff for Lisbon, Portugal.

The flyers, Capt. Ranieri, the pilot; Lieut. Squaglia, Sergeant Cremaschi, mechanic and Sergeant Eyster, radio operator, were taken to a hospital. Lieutenant Squaglia died as the result of congestion of the lungs.

Motor trouble caused the giant machine to turn over as it was leaving the runway of Delgado, Azores, with 14 others for Portugal and home, after flying thousands of miles from Italy to Chicago and back. In an accident at Amsterdam in the outward journey, one flyer was killed. The ill-fated ship was called the "I-Rani."

Summer In North Over

Churchill, Man.—Although mid-summer heat waves are taking their toll south of here, fall winds are already blowing across the wastes north of Churchill. Autumn is fast approaching. This fact is brought home to residents of Churchill by the movements of trappers and birds. The trappers are moving north to their lines. The birds are moving south to the prairies.

Program Is Completed

Churchill, Man.—The week ending August fifth saw the summer program of the Hudson Bay Railway ballasting and re-conditioning operations practically at an end. During the week the industrial spur running along the Manitoba government townsite, was completed. This spur is about one mile in length.

May Turn To Britain

Winnipeg, Man.—Influenced by the cordial reception given the new Canadian loan of \$15,000,000 in London, Winnipeg may seek to foot further issues in the British market. Mayor Ralph Webb said. Since 1914 Winnipeg has depended on the Canadian and American markets for capital requirements.

Celebrates Birthday

Stanley Baldwin, Lord President of the Council and one of the most popular leaders Great Britain has ever produced, was the recipient of birthday greetings recently when he passed the sixty-sixth milestone.

Eggs For Northern Port

Two Hundred Dozen Shipped To Chesterfield Inlet

Ituna, Sask.—Fresh eggs that likely won't be so fresh when they reach their destination, left Ituna recently. Two hundred and ten dozen were consigned to Sergeant Wight and Constable N. Yates at Chesterfield Inlet, N.W.T.

These eggs, packed in salt, will be food for these policemen in the north next winter. Eggs are scarce up there and fresh eggs unknown that far north.

Constable Yates, an Ituna farm lad, wrote home before he went north he never dreamt that he could eat "rejected" eggs but has learnt how since. Eggs packed in salt will keep good for over a year. They will go via railroad to Churchill and from there will be transported to Chesterfield Inlet, on a Hudson's Bay Company's service boat.

B.C. Orientals Grow Poppies

Mounted Police Said To Be Investigating Matter

Victoria, B.C.—Royal Canadian Mounted Police are believed to be investigating growth of poppies by Orientals on several tracts of land at Saanich near here. Under the law poppies may be grown but not harvested. Dried poppies brewed into tea have a morphine content of 8 per cent, according to medical authorities.

It is considered likely a test case may develop in anticipation of legislation at Ottawa forbidding growth of the flower altogether.

CHINESE MINISTER TO VISIT OTTAWA

Dr. T. V. Soong (inset), Chinese Minister of Finance, who recently attended the World Economic Conference in London, England, has arrived at Ottawa to interview Hon. H. H. Stevens (above), Canadian Minister of Trade and Commerce, with a view to increasing the trade between Canada and the Orient.

Bus Line To Churchill

Motor Bus Service Between The Pas and Northern Port Is Planned

Saskatoon, Sask.—Operation of a motor bus service between The Pas and Churchill during the 1933 navigation season is proposed by the federal department of railways and canals, it was learned here. It is believed transportation will be by motor bus operating on railway tracks.

The service will start August 10 and continue until October 15 and the post office department has made arrangements for weekly postal service between The Pas and Churchill, although intermediate points will not be served.

The mail-bearing bus will leave The Pas each Tuesday at 11 o'clock in the morning to arrive at Churchill the following evening; the return mail will leave Churchill each Saturday afternoon or Sunday morning to arrive at The Pas Monday afternoon.

Receive Warm Welcome

People In Peace River Country Travel To Meet To Greet Beesboroughs

Edmonton, Alberta.—Along the far flung Peace River front ringing cheers welcomed to that country Canada's Governor-General, the Earl of Beesborough, accompanied by the Countess of Beesborough and party.

Their Excellencies were feted all along the route on their first day's tour of the country. People came from miles around displaying the spirit of the early pioneers, to vie with each other in welcoming the vice-regent and countess.

A warm welcome at McLennan, the first stop, was followed by receptions at Falher and Peace River.

Perfect weather prevailed to mark their Excellencies' visit to the north country, a visit which they had planned last year but which had to be postponed.

Banking Investigation

Most Important Matter Before Canadian People At Present Time

Winnipeg, Man.—"The royal commission on Canadian banking and currency is by far the most important matter before the Canadian people at the present time," in the opinion of Hon. Ian MacKenzie, M.P., Vancouver centre, in Winnipeg from Great Britain.

Mr. MacKenzie, who has ardently pressed for the commission since 1930, declared "recovery from our present alarming situation will be based on a proper financial system" and expressed entire approval as to the choice of Lord Macmillan as chairman of the commission.

STUDY OF U. S. RECOVERY PLAN IS URGED HERE

Victoria, B.C.—"A statement in the press that Canadian Business Association in Montreal are making a survey of the direct and indirect results of the United States national recovery act is very interesting," commented Premier S. F. Tolmie of British Columbia, recently.

"I think the whole of Canada is watching the present efforts of the industry to the south of us to bring back prosperity. They are most interesting experiments which should be carefully observed and those which appear to be practical and of benefit to Canada might be adopted here."

"The depression has given us a new vision of conditions and standing cut prominently in our experience of recent years is the fact that we cannot have real prosperity without a bigger share and steeper revenue from the farmer and the wage earner."

"More orderly selling can play an important part here. The day of excessive profits appears to be past."

Winnipeg, Man.—Canada should study closely the policies involved in the United States national recovery act and their effects, and act at the earliest possible moment in the light of the experience gained, the opinion of Premier John Bracken of Manitoba, expressed in a statement issued to the Canadian Press recently.

Mr. Bracken said, aside from lessening the barriers to trade, he could see no reasonable alternative to the adoption of some such policies in Canada, modified, where necessary, to meet different conditions, but having the same purposes in view.

New Public School Readers

To Introduce Change For Western Provinces When Conditions Permit

Banff, Alberta.—Introduction of new readers in public schools of the four western provinces will take place when special conditions permit. It was decided at the meeting of the inter-provincial education committee here.

The committee consists of deputy ministers of education for the four western provinces. They are: Dr. Robert Fletcher, Manitoba; Dr. J. S. Huff, Saskatchewan; Dr. John T. Ross, Alberta; and Dr. S. J. Willis, British Columbia.

Hon. Perren Baker, minister of education for Alberta, also attended the meeting to discuss educational problems common to the four provinces.

A special committee studied the reader question and decided those now in use should be discarded in favor of up-to-date books when finances permit. The present readers have been in use for 15 years.

May Not Be Represented

Toronto, Ont.—Canada may not have a Bisleys team next year, according to Col. F. F. Clarke, Montreal, chief range officer at the Ontario Rifle Association meet. The Dominion Rifle Association, which annually sends the team to Bisleys, "is having a hard time to make both ends meet" since governmental grants to the association have been reduced.

Reduce Tax Rate

Prince Albert.—Local tax payers heard good news when they learned the city council had approved tax rates for 1933 which reduced the mill rate 1.70 mills below last year's rate. Public school supporters will pay 43 mills, and separate school supporters 44.20 mills.

Sells Horses

Saratoga Springs, N.Y.—The entire stable of Victor Emanuel has been sold at public auction at the sales ring and 18 head sold for a total of \$38,400 for an average of \$2,133.

Radio Institute

Toronto, Ont.—The Telegram today states plans have been completed for the establishment of an institute of radio-therapy in London, Ont., to be in operation early next year.

Holborn Happenings.

On Monday, Aug. 7th, the Juniors held a special business meeting. A resolution to plant trees about the hall for beautification, on the consent of the Community League, was put thru.

Mr S Wright, the new editor for the Junior Press, must be given great praise for the Writes-up of the new paper.

This year the Juniors were cordially invited to attend a Field Day at Olive Farm. Speeches from most of the men from the Department of Agriculture were heard, and were very interesting. Deene Howes appealed to the sense of duty and beautification of the home.

Mr Carlyle also gave an interesting talk on dairy cattle. He also gave us an illustration of his talk. The representatives of the different clubs were then shown about the farm and given an idea of their experiments on forage crops and their silages.

Refreshments were served at the grounds—milk, ice cream and a place to recreate. A few of the young people were exceedingly interested with their sight-seeing at the broadcasting station near the Farm.

Mr H Aubrey is now the proud possessor of a Ford coach.

Good hard playing was exhibited in the basketball game on Aug. 11 between Holborn and Brightbank. The final score was 7 to 2 in favor of the former.

The Aug. 11 dance is one long to be remembered—a very large crowd attended, making the old hall ring with a jolly good time.

Mr N F Priestley's meeting at Rosenthal was attended by a very large crowd. At Holborn the following day Aug. 13, a very interested crowd also attended. Mr Priestley was certainly able to satisfy their doubts here.

Many of the farmers in the district have commenced to swing the lash over the binder reel to the tune of 80-cent wheat.—H.J.K.

Edmonton Beach.

When J. Nichols, owner of the Lakeview Store, failed to comply with the orders of the Municipal District of Inga he was fined \$5 and costs by Mr McCollough, J. P. He was also ordered to have his building moved off the road allowance.

Mr Nichols had been given notice to move his buildings some time ago, but apparently took no heed until action was taken by the Municipality. McCollough J.P., Officer Bone and Mr Geo. J. Bryan verified the measurements of the road allowance.

Value of Heat Insulation.

Substantial fuel economies are certain to follow once Canadian householders become thoroughly cognizant of the value of heat insulation in buildings, is the opinion expressed by Dominion Fuel Board officials. The present low cost of insulating materials is emphasized by the Board in urging that increased quantities of these materials be used this year in the construction of new dwellings, and that "every architect, builder and householder make a thorough study of heat insulation, and apply its principles whenever and wherever possible."

The Fuel Board has issued a well illustrated 73 page booklet entitled "The Insulation of New and Old Houses," containing an exhaustive discussion by G D Malloy of the National Development Bureau, Dept. of the Interior, on the proper use of insulation in the construction of dwellings, and on the various avenues of heat escape. A section of the booklet is devoted to the problems of the owners of homes built before modern insulation came into vogue. Heat insulating materials are derived from products of forest, farm and mine, many of which, it is stated, were formerly regarded as waste. A charge of 15c is made for the booklet, copies of which may be obtained from either the National Development Bureau, Dept. of the Interior, or from the Secretary, Dominion Fuel Board, Ottawa.

SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during class and when she is supposed to be drawing a Grecian urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder and she finds it to be Peter, who apologizes for his action and consoles her. Camilla secretly adores him. He makes a date to see her that evening but is astounded when she names an expensive night club. It is far beyond his means but he resolves to go through with it. Peter takes her to the theatre first and then to the night club where they meet some of Camilla's friends.

(Now go on with the story)

CHAPTER IV.

Peter danced with Cathie, his arms aching for Camilla. He felt clumsy now, and self-conscious. But Cathie told him gushingly, "You're a marvelous dancer, Mr. Anson. I could dance with you all night."

"I'd never last that long. And I don't like to dance, anyway," he told her bluntly.

"Not even with me?" she pouted.

"Oh, you're all right. It's just that I don't like to dance."

"Then why did you bring Camilla here?"

"Because she wanted to come here, I believe."

"That's just like her. She gets everything she wants."

"I suppose so. But why shouldn't she?" defensively.

"That's what everyone seems to think. But she never troubles herself about making anyone else happy—any more," Cathie amended.

"Has she changed—recently?"

"She is more changed every time I see her, which isn't often. She doesn't play with the crowd like she used to, and she acts most of the time as if she were far away, when she is around."

"Perhaps she's getting serious about life and trying to find some definite work. I met her at National."

"I know. She's been going for the intellectual stuff in a big way and cutting the rest of us. She is downright snooty, lately," Cathie shrugged.

"Perhaps you just imagine it," Peter defended her. "Any kind of study takes a lot of one's time and mind. I'm sure she doesn't intend to high-tat you."

"You're pretty crazy about her, aren't you?" Cathie's eyes narrowed.

"Call me crazy if you like," he smiled.

"Well, she will treat you like all the rest. Almost every fellow in our crowd has had his crush on Camilla."

and his cure. They all get over it after she has kept them miserable for awhile."

"What nice sharp claws your kitten has!" thought Peter, and smiled. "That makes it nice for me, that she gave them all the gate, because I might be the exception to the rule, after all." His eyes flashed sternly, "Make that sleep in the face, now. You asked for it!"

But nothing daunted Cathie. "Oh, yeah? Well, if she's too cruel, bring your wounds to me and I'll bandage them up for you. I might feel sorry for you because you're a nice boy. Heart wounds are serious."

"Thanks a lot, Miss Hairy. You are very kind." She ignored the reproof in his voice, and when they danced again, spoke only in gay banter. Peter's eyes followed Camilla's lithe grace in Terry's arms, covetously. He grudged the loss of one moment with her, the more because he knew he would never dare to take her out again.

The supper order appealed him. Lucky he had brought the extra money. He was in for it, all right. And he might expect the same thing to happen any time he made a date with Camilla. She had scores of wealthy friends whom they would encounter everywhere. As her escort, he had to be prepared to act as host any time.

Passing her on the floor, he sang to her with the orchestra, "Save the last dance for me, sweetheart."

She nodded smiling. The last, she thought. The last, for ever, perhaps, and wondered if she would care much if it were.

Peter ordered more drinks when they returned to the table.

"Nothing for me," Camilla declined. As host, Peter felt obliged to join his guests. "Ginger ale," he said, and apologized to Terry "Eight o'clock class tomorrow and a headache won't go."

"Don't you take the grid?" drawled Terry, luxuriously sipping his high ball.

"Grid?" Peter exclaimed with surprise.

"Mr. Anson is one of those rare people who likes to use his brains," Camilla explained.

Was she laughing at him, Peter wondered, and grew miserable. Perhaps Cathie was right. She was beginning already to punish him for his absurd hopes.

The waiter presented two bills, one for the food and one for the drinks. The total astounded Peter, but he paid without a flicker of hesitation. He had had his fling and it would last him for awhile. "Let that be a lesson to you," mocked the orchestra and the tenor soloist, in a sudden crescendo. It would be, he resolved.

But when he took Camilla into his arms for the last dance, he forgot his finances and looked like a super-charged and super-charged that looked to him like the figures of a bar's resources.

"Goodnight, sweetheart," sighed the music, "till we meet tomorrow," crooned the tenor's plaintive voice. "Gone and parting may make us forlorn," echoed Peter's heart; then Camilla raised her eyes to meet his and his hopes lifted, "but with the dawn, a new day is born, so I'll say goodnight, sweetheart, goodnight."

The ride home was far too short in time and far too long by the taxi meter that ticked with jarring incessance. Peter wished that he might dismiss the cab and nonchalantly walk home after a lingering goodnight, but Camilla managed that.

"You needn't come in. It's very late and you have an eight o'clock class, you know. I've had a lovely time, Mr. Anson."

"Thanks, Miss Hoyt. So have I. Did we chase away your black-blues?"

"Oh, yes, I'd forgotten them. That's good. Well, goodnight."

She placed her little white-gloved hand in his. The soft night air rumbled the bright hair on his bare head and she stifled a sudden impulse to reach up and smooth it.

"Goodnight," she whispered, and was gone before he could think what more to say.

The pulsing motor of the cab recalled him to his senses. He sprang in and slammed the door. He rode only to the nearest car line and dismissed it, parting with a last ten dollars, half of which he received in change. It was all that was left of his "roll" that he had provided for

appearances, promising himself to re-deposit most of it on the following day. But it was gone, and all he had was a sweet memory that would have to last him for many months.

Camilla flung herself upon the high mahogany four-poster bed. Long ago, when she had first slept in that bed, she had felt like a fairy princess. It had symbolized the utmost in grandeur and luxury to her then. For the past three years, she had hated it more every night she slept there. But she was not thinking about that tonight. She was hating Peter. At least, that is what she declared to herself, over and over. That was because she was sure that she never could have him.

Then her memory exulted in the way he had looked at her when she danced, the dear words he had said. He was so precious, just as she had known he would be before he had talked to her that day. Was it only today that he had first spoken to her, and changed her whole world? How strange life was, that years could pass in which nothing of importance ever happened, and then a few hours could suddenly hold so much happiness and beauty!

"But he didn't ask to see you again!" her thoughts leaped, and she was plunged into misery again. He only had been sorry for her because of the incident in class that day, and taking her out was his chivalrous way of apologizing. Her face burned with remorse at the memory of finding her in the park in tears. "I angered her. She was angry and hurt—because she was in love and not at all sure of being loved. That was why she wanted to take Peter."

(To Be Continued.)

Thunder Storms Never Cease

About 1,800 Raging In Different Parts Of World Every Minute

It is estimated that the approximate number of thunderstorms occurring over the whole earth in the course of a year is 10,000,000.

This works out at 44,000 a day, and if we make allowance of an hour for the average duration of each, a simple calculation tells us that at any one minute there are probably some 1,800 storms raging simultaneously over the continents, islands and oceans.

From the known mean rate of electrical discharges it may also be deduced that in every second of time there must be about 100 flashes of lightning passing either from cloud to earth or from cloud to cloud in various corners of the globe.

Thunderstorms reach their greatest frequency within the tropical regions, where 100 to 150 a year is quite an ordinary number. In parts of Java and near the mouth of the Amazon the normal annual number is said to exceed 200, and with such regularity do the storms break out there during the latter half of the day that certain seasons that in issuing invitations a week or two ahead it is customary to indicate whether guests are expected to arrive before or after the usual deluge.

One Air Banned

There is no man in the Navy more popular than Admiral Sir John Kelly. The stories told about him are legion. Once, when directing general drill, in which it is customary always to include at least one "banned" order, he gave instructions: "Three bandsmen from each ship are to be sent to the flagship, and on arrival to play 'popular air.' There was added, above his signature, this note: "For the purpose of this exercise, 'His Majesty's own Kelly' will not be recognized as a popular air."

QUIVERING NERVES

Yield to Lydia E. Pinkham's Vegetable Compound

When you are just on edge... when you can't stand the children's noise... when everything is a burden... when you are irritable and blue... try this medicine. 98 out of 100 women report benefit.

It will give you just the extra energy you need. Life will seem worth living again.

War Enemies Never Met

Foch and Hindenburg Disappointed When Plans Were Spoiled

Hindenburg had his great antagonist Foch never met.

Nor did the field-marshal-president ever have the opportunity of talking over the war with Petain, Joffre, Lyautey, Fayolle and Franchet d'Esperey, the other French marshals. Yet like a good professional soldier, he would have liked nothing better.

However, he came within an ace of meeting Foch, for whose character and tactical ability he had the highest regard. It took his elevation to the presidency of the Reich to forestall what would have been a historic encounter.

In the autumn of 1924, Foch told his aide, Major Rene L'Hopital, that he hoped some day to meet Hindenburg, "not as a Frenchman and a German, but as two old soldiers."

L'Hopital, who knows German as thoroughly as he knows English got busy. Through personal friends in Berlin, he had his chief's desire brought to Hindenburg's ears. The old marshal readily acquiesced. Then came the problem of how to arrange the meeting. Nationalistic feeling was running high in both France and Germany. Hindenburg's hobnobbing with the hereditary enemy would have caused a storm of protest. Foch's fraternizing with his German counterpart would have made the Third Republic red.

L'Hopital, always a diplomat, found a way out. Foch was to go down to Strasbourg ostensibly to inspect the view to take place in the early spring garrison. Hindenburg at the same time would be taking the cure in Baden-Baden. Overnight the ex-generalissimo of the Allies would motor over the Reich bridge, unannounced, with L'Hopital to act as interpreter.

The stage was all set for the interlude of 1925. Then Hindenburg's fellow-countrymen elevated him to the presidency. And while a retired German army officer might very well meet a retired French army officer privately, it was naturally out of the question for the president of Germany to receive Marshal Foch under any circumstances.

Foch regretted the missed opportunity until his dying day. "I have the highest regard for Hindenburg," he frequently told friends, "I consider him a really great man."

THE RHYMING OPTIMIST

By Alice Mitchell

PERSPECTIVE

Let me not ever live too near
The things that cause me fret and fear.

Let enemies I look upon
May loom so vast they hide the sun.
And with dark shadows shut away
The glamour of the golden day.

Nor let me hold too near my heart
The loves which form life's happiest part.

Too much of brilliance blinds the eyes,
May I love well, yet still be wise

And go, undazzled by the gleam
Of love, which makes earth's loveliest dream.

Let me not ever live too near
The things most dreaded or most dear.

Too much of shade, too much of flame,
Sight, dimmed or dazzled, is the same.

Ah, let me see my bliss or strife
As part, but not the whole of life!

New Hybrid Cats

Experiments At University Of Saskatchewan Produce Drought Resistant Variety

New hybrid of cats under test at the University of Saskatchewan are showing much greater resistance to drought than the standard varieties. Dr. J. B. Harrington, in charge of certain experiments, observes. Several varieties of barley such as Coleas and Regal also show far more ability to withstand drought than O.A.C. 21 barley common grown.

Dr. Harrington believes that the experiments reveal this year while crops are small will provide valuable information on such questions as the smattering of grain varieties.

Needed Sea Trade

A Polish poet of the 16th century said that "a Pole need not know what sea he is in—try this medicine." But modern Poland has learnt that her prosperity demands sea trade, and she is now a good seafarer.

Little Helps For This Week

"The God of all grace who hath called us unto His eternal glory by Christ Jesus, after that ye have suffered awhile, make you perfect, stable, strengthen and settle you." — Peter 5:10.

How shall thou bear the cross that

So bread a weight appears?

Keep quietly to God, and think
Upon the eternal joys.

The world has no room for coward. We must be ready some day to toll, to suffer, and to die. And yours is not the less noble life because no drum beats before you when you go out into your daily battlefields, and no crowd shouts about your coming when you return from the daily victory or defeat.—Robert Louis Stevenson.

We cannot say this or that trouble shall not befall, yet we may by help of the Spirit say nothing that doth befall shall make me do that which is unworthy of a Christian.—R. Sibbes.

Hero Glider Record

German University Student Remains

Kurt Schmidt, Koenigsberg University student, flying a glider he built himself descended after setting a new world's record of 36 hours and 27 minutes.

He had remained at an altitude of 200 to 300 metres (650 to 1,000 feet) to beat the former record of Lieut Cooke, who established a mark of 21 hours and 54 minutes in Honolulu.

Schmidt, 27 years old, is a Nazi storm trooper who was shot down in the war. When he was carried out of his glider he was carried upon the shoulders of his enthusiastic companions to the Luftport club, where from sore eyes, since he wore no goggles, he was in no wise exhausted.

SPANISH CORN PUDDING

Half cup sweetened condensed milk, 2 1/2 cups corn cut from cob or canned corn, 1/4 cup chopped green pepper, 1/4 cup butter, 1/4 cup sugar, 1 tablespoon chopped onion, 1 teaspoon salt, 2 eggs.

Blend sweetened condensed milk, corn, chopped green pepper, chopped pimento, chopped onion, salt and well-beaten eggs. Pour into buttered baking dish and bake 25 minutes in a moderate oven (350 degrees Fahrenheit). Serves six.

Royalty Learns to Box

Since it has become known that the Prince of Wales and his two nephews, Lord Lascelles, and the Hon. Gerald Lascelles, have learned to box, both boys and girls of prominent London families are learning the art of pugilism at the request of their parents. The princess royal attended a boxing exhibition in which Lady Mary Cambridge, the queen's great-niece, took part.
